

A Teacher's Guide to Kids Academy Classroom

www.kidsacademy.mobi

For teachers, learning about a new tech or app can be daunting with their ever-growing workload and with what little time they have for lesson planning. However, Kids Academy Classroom makes it as simple as possible to integrate this cutting-edge new tool into their lessons with ease. Classroom is an innovative online space that allows K-3 educators to easily share learning activities directly with their students. With Classroom, teachers have Kids Academy's expansive library of resources at their fingertips...and can share them with a single click!

6 Easy Steps to Using Kids Academy Classroom

Watch this quick tutorial for teachers on using the Classroom or read the simple steps below:

Watch on [YouTube](#)

Step 1. Access Kids Academy Classroom

Currently available free of charge, Kids Academy Classroom is hosted at the <http://www.kidsacademy.com> website*. From there, head over to the left side of the page that

is labeled “School” and click on the button that says, “Start My Classroom Free”.

*Please note that it’s a different domain (.com) than our main website (www.kidsacademy.mobi).

Step 2. Create a digital classroom

Once clicked, a new screen will pop up where teachers can enter their grade level, subject, and to input a name. Keep in mind that students will see the name that was entered, so don’t use a nickname or a first name if you prefer them to call you something more formal, like Ms. or Mr. Smith. Click “Next” when ready to move. In the newly created Classroom, click the big plus button and search for activities to use from the Kids Academy library.

The screenshot shows the 'CLASSROOM' creation interface by Kids Academy. At the top left is the logo, which consists of a colorful geometric shape and the text 'CLASSROOM BY KIDS ACADEMY'. Below the logo, the screen is divided into three main sections. The first section, 'Choose a Grade', contains five buttons: 'Preschool', 'Kindergarten' (highlighted in blue), 'Grade 1', 'Grade 2', and 'Grade 3'. The second section, 'Choose a Subject', contains eight buttons arranged in two rows. The first row has 'Math' (with a pencil icon), 'English' (with 'ABC' letters, highlighted in orange), 'Reading' (with a book icon), and 'Science' (with a flask icon). The second row has 'Social Studies' (with a globe icon), 'Chess' (with a chess piece icon), and 'World Around Us' (with a globe and people icon). The third section, 'Type your name', features a text input field containing 'Ms. Jackson' and a green 'Next' button. Below the input field, a small note states 'Your students will see it in the Classroom'.

Step 3. Find and add activities to your Classroom

Use the tabs along the top of the screen as a filter to find the activities you want to add. Teachers can browse all activities at once, or click tabs to view worksheets, educational videos, or quizzes. When you find an activity that fits, click the plus sign over the thumbnail to add it to your Classroom.

Step 4. Preview activities to learn more about them

To preview an item, press the play button. A description of the resource will open that shows a summary and lists the standards that are aligned with the activity. Press the play button on this screen to view a demo of the assignment that allows teachers to see the student view and functionality.

Step 5. Invite Students!

After you've finished building your Classroom, click on the "X" in the top right corner of the screen to head back to the dashboard that displays your assignments. When ready for learners to join, click "Start Classroom". Instruct your students to head to <http://www.kidsacademy.com/go> and type in the 4-digit code displayed on your screen.

Alternatively, teachers can share a join link with students directly.

Click on the "Classrooms List" button to monitor who has or has not joined and don't forget that once you begin your Classroom, learners have an hour to join! Once joined, however, they can stay in a Classroom as long as needed.

Step 6. Monitor Progress

The Classrooms List button doesn't only provide a roster but also houses the reports. Click the "View Report" button to see the class average on any assignment and from there teachers can click into an individualized report for each student and activity.
