

Interactive Puzzles

www.kidsacademy.mobi

Interactive Puzzles invite kids to try their hands at doing their most favorite scenes from the book app “Three Little Pigs”. Choose a 6-, 9-, or 15-piece puzzle and drag pieces to the center of the display.

If a scene is a real challenge for your kid, try switching on a semi-transparent mode by tapping a question mark on top.

Accompanied by special visual and sound effects, puzzle games help kids improve shape and color recognition and hone kids’ fine motor skills.

The fun activity pack with Interactive Puzzles is coming soon on the AppStore. Stay with us for an exact date of its release!
