# Introducing Talented and Gifted Online: The Ultimate Online Learning Program for Kids

[www.kidsacademy.mobi](http://www.kidsacademy.mobi)

Kids Academy is thrilled to announce the launch of **Talented and Gifted Online** (TG Online) a comprehensive learning program designed to revolutionize education for children in preschool through third grade! With a focus on delivering high-quality, engaging learning experiences for kids, TG Online offers over 7,000 learning activities based on Common Core standards and covers all the major subjects including math, reading, writing, social studies, science and more!

**TG Online can be easily accessed on any device or web browser, making it our most flexible platform ever!**

At Kids Academy, we aim to provide educators and parents with a flexible and dynamic tool to support student learning, whether kids are at home or in the classroom. In addition to our apps and printable resources available on our website, we are proud to offer a complete learning program that is available anytime, anywhere, without the need for a mobile device. TG Online can be easily accessed on any device or web browser, making it our most flexible platform ever!

## What's Included?

TG Online is your child's internet hub for learning as it houses everything we have to offer organized into units packed with a variety of lessons and activities. While you can find learning materials on our main website, TG Online does all the hard work of lesson planning for you! It provides complete courses in the following subject areas:

- Math
- English Language Arts
- Reading
- Science
- Social Studies
- World Around Us (for preschoolers only)
- Chess

For kids who are naturally curious, parents and teachers can also find coloring pages in the Arts and Crafts section, as well as a complete course in chess. Extend your child's creativity and problem-solving skills by challenging them to learn beyond the traditional curriculum.

## Spelling Patterns (3 lessons)

## Decoding Syllables (4 lessons)

### Lesson 1: Identify the Sound of Different Syllables in Words

**Two-Syllable Words**  
Video

**Open Syllables**  
Worksheet

**Closed Syllables**  
Worksheet

Each subject area is broken down into a series of units and chapters featuring professionally crafted lessons needed to master the skills. To progress through the course, each lesson must be completed to unlock the next one. In general, in all learning blocks students will be presented with a mixture of the following activities:

- Worksheets

AI-supported worksheets are at the core of our instructional resources and serve as the main activity children use to practice the skills they're learning. These worksheets aren't the ordinary, boring pages you remember from elementary school, either! The worksheets provided in each unit include eye-catching graphics, professionally voiced instructions and a diversity of tasks like puzzles, mazes, tracing, multiple choice questions and so on. And thanks to AI, they are scored immediately for instant feedback and motivation. Worksheets also present information in short, easy-to-digest chunks, so that kids enjoy completing them and do not get bored or frustrated.

- Learning Videos

Videos embedded within each lesson can take a few different forms, from engaging sing-along songs to full teacher-led lessons! Depending on the subject and topic, students may read along with storybooks, nursery rhymes, or find cute and catchy topic-based videos with cartoon characters. Some videos represent complete lessons in which teachers walk students through a skill and/or activity.

Each video is expertly designed to support the skills kids practice in the worksheets and are assessed upon in the quizzes. Additionally, teacher-led videos were created by real educators who know how to present concepts in a way that is engaging and fun.

- Quizzes

It's always important to assess skill mastery before moving on to another lesson or unit. That's why quizzes are included in many units so both kids and adults can gauge learning. While the word "quiz" may be a scary one for children in older grades, those in the TG Online program are short and to the point so that it feels more like solving a puzzle or playing a mini-game than taking a test. Just like the worksheets, quizzes offer instant feedback and positive reinforcement, along with additional clear explanations, adorable images and pleasant voice over that keep kids excited while learning.

A screenshot of a quiz interface. At the top, there are five numbered buttons (1-5) and a close button (X). Below this is a speaker icon and the instruction: "Drag and drop the number that comes next into the blank spot." The main area shows a sequence of numbers: "2, 3, 4, \_" where the numbers are colorful and stylized. Below the sequence are two more numbers, "6" and "5", also colorful and stylized. At the bottom is a green "Confirm" button.

- Dress-up Game

Not only does TG Online offer an all-in-one learning program, but it also features a charming token economy game with Eddie the Elephant. This feature allows learners to earn stars by completing lessons and to spend them “buying” Eddie accessories. Children can dress him up and change his color to customize the elephant in any way that they want! All they have to do is collect enough stars by completing activities, which creates an enticing, motivational game out of learning and completing activities.

## How to Access TG Online

Accessing TG Online is easy and available on any device that has a web browser! Because it is a complete learning program created by experts in education, a subscription is required for full access. For our current Talented and Gifted (TG) app users, TG Online is free with no extra cost! Simply use your TG app credentials to gain access to TG Online from any computer and browser.

For new users, we are offering a [1-month free trial](#) so everyone can have enough time to explore the app and decide whether they want to proceed with a paid subscription! Users can navigate to the site and click on the button that says “Start Free Month” to get started.

Kids Academy is so excited to introduce Talented and Gifted Online as it allows all families and teachers to access our learning program easily on any device. To explore the program and find out more, please visit us at [www.kidsacademy.com/tg/](http://www.kidsacademy.com/tg/) and take advantage of a free month of learning.
