

Setting Up Your Account with Kids Academy for Schools with Google Classroom

www.kidsacademy.mobi

Setting up your online classroom has never been easier now that Kids Academy for Schools is fully integrated within the Google Classroom platform! Most teachers know what a pain it is to teach students to use a brand-new app. Not only do children struggle to remember new usernames and passwords, but just setting up the account and adding your students can take hours for even the most tech-savvy instructors!

That's exactly why Kids Academy has forged a new partnership with Google Classroom that allows educators to quickly and easily set up their accounts so that time can be spent on what matters most: learning! Let's take a closer look at how to get started setting up your account and assigning work in 4 easy steps:

Step 1: Log in to Kids Academy for Schools Using your Google Account

Teachers have enough on their plates, and we know that logging into multiple accounts can be a hassle. Thanks to our Google Classroom integration, all educators need to do is log in using your existing Google credentials!

To get started on the web, head over [here](#) and click the log in button. Click "Log in with Google" to sign in using your Google username and password.

Step 2: Import Students to Set Up Your Online Classroom

With 20 or more students in your class, it can take a long time to set up an account for all your little learners. If your students aren't already enrolled in an existing Google Classroom section, see the below steps to import students from your rosters to your Kids Academy account.

Begin by using either Kids Academy for the Schools, or Kids Academy app to import children to your account. Let's see how to import students in a few easy steps:

- First, navigate to the "Students" section to get started. Once there, click on "Import from Classroom" to select students from your Google rosters.

The screenshot displays the Kids Academy interface. On the left is a dark blue sidebar with navigation icons and labels: Dashboard, School, Classes, Curricula, Students (highlighted with a red box), Reports, Learning Resources, Licenses, and Apps. The main content area has a light gray header with three buttons: "+ Add a new student" (blue), "Import from Classroom" (green, highlighted with a red box), and "Activate students" (gray). Below the header is a table of students with the following columns: First name, Last name, Grade, and Status. Each row has a checkbox on the left.

<input type="checkbox"/>	First name	Last name	Grade	Status
<input type="checkbox"/>	Kristian	Karey	Pre-K	Active
<input type="checkbox"/>	Johnatan	Ryte	Pre-K	Active
<input type="checkbox"/>	Lily	Turner	Grade 3	Active
<input type="checkbox"/>	Leola	Bartlett	Grade K	Active
<input type="checkbox"/>	Ken	Lakin	Pre-K	Active
<input type="checkbox"/>	Roland	Dudley	Grade K	Active
<input type="checkbox"/>	Myrtle	Boyd	Grade 1	Active
<input type="checkbox"/>	Bertie	Newman	Grade 1	Active

- From there, select the Google account that is associated with Google Classroom.
- Next, select the class to import students from. This option gives educators an opportunity to import individual students, which allows for easy differentiation for your students with unique learning needs. Finally, select the grade level you would like your imported students to be classified, and click "Next".

Import students from google classroom

Choose a class to import students from:

To share

Choose a grade for the students: (You can always change the grade in student's profile)

Pre-K

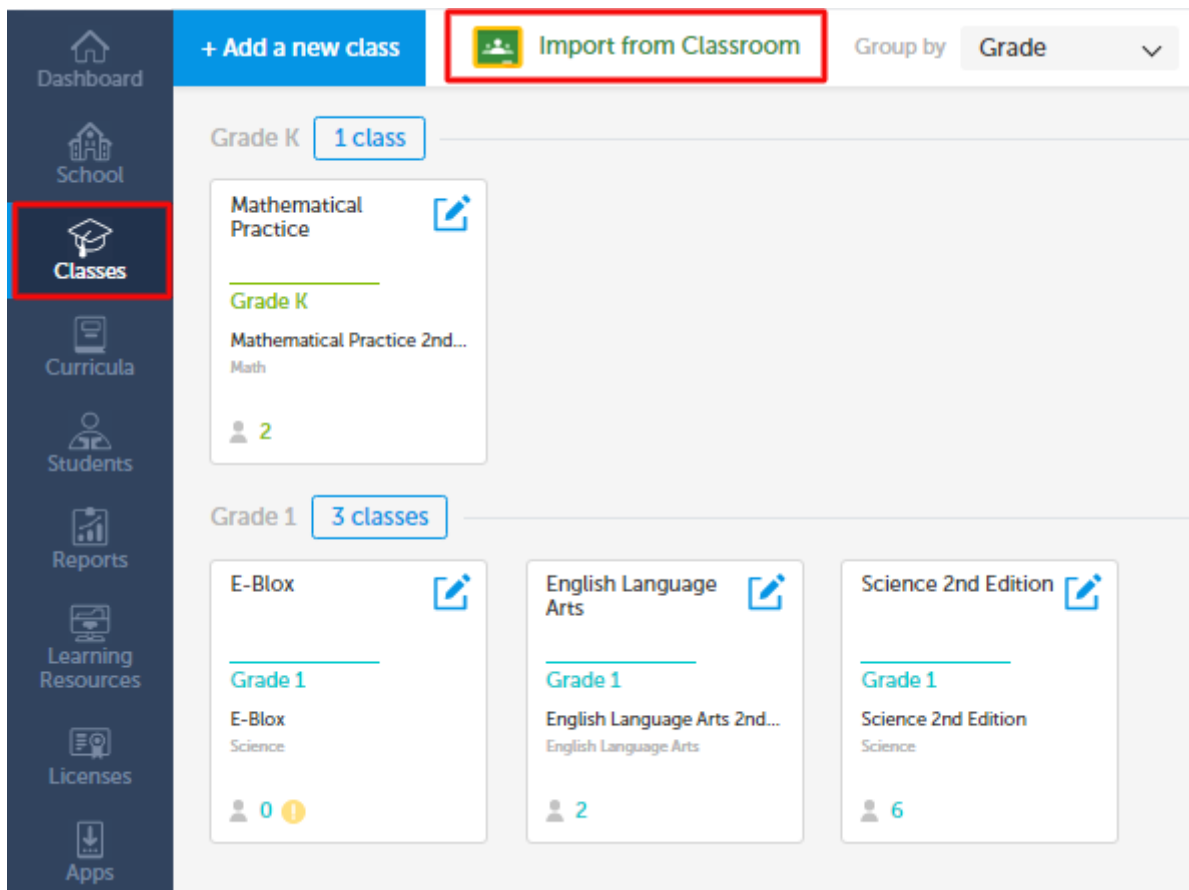

Next

That's it! Once students are successfully imported, you can easily find them in the "Students" section of Kids Academy for Schools, and in the app. Now you can enroll your students in a class and assign a ready-made curriculum or create one on your own to customize your lessons.

Step 3: Import Your Entire Class

Are your students already enrolled in a Google Classroom section? To make the process even simpler, teachers can import entire classes at once. Follow these steps to import your classes to your Kids Academy account:

- First, choose either Kids Academy for Schools on the web, or use the app. To get started, navigate to the "Classes" section to select whole classes to import to your account.

- Just like the instructions above, select the Google account associated with Google Classroom.
- Select the class you would like to import into your Kids Academy account. Then, select the grade level you would like your imported class to be classified.

The image shows a dialog box titled 'Import class from google classroom' with a close button (X) in the top right corner. Inside the dialog, there are two dropdown menus. The first is labeled 'Choose a class to import:' and has 'Personal class' selected. The second is labeled 'Choose a grade for the class: (You can always change the grade)' and has 'Pre-K' selected. At the bottom right of the dialog is a blue 'Next' button.

Once completed, your imported class contains all the same information that Google Classroom provides, such as student names, grade, and description. Thankfully, you

won't need to waste precious time to fill out information about your students or classes because it all transferred during the import process.

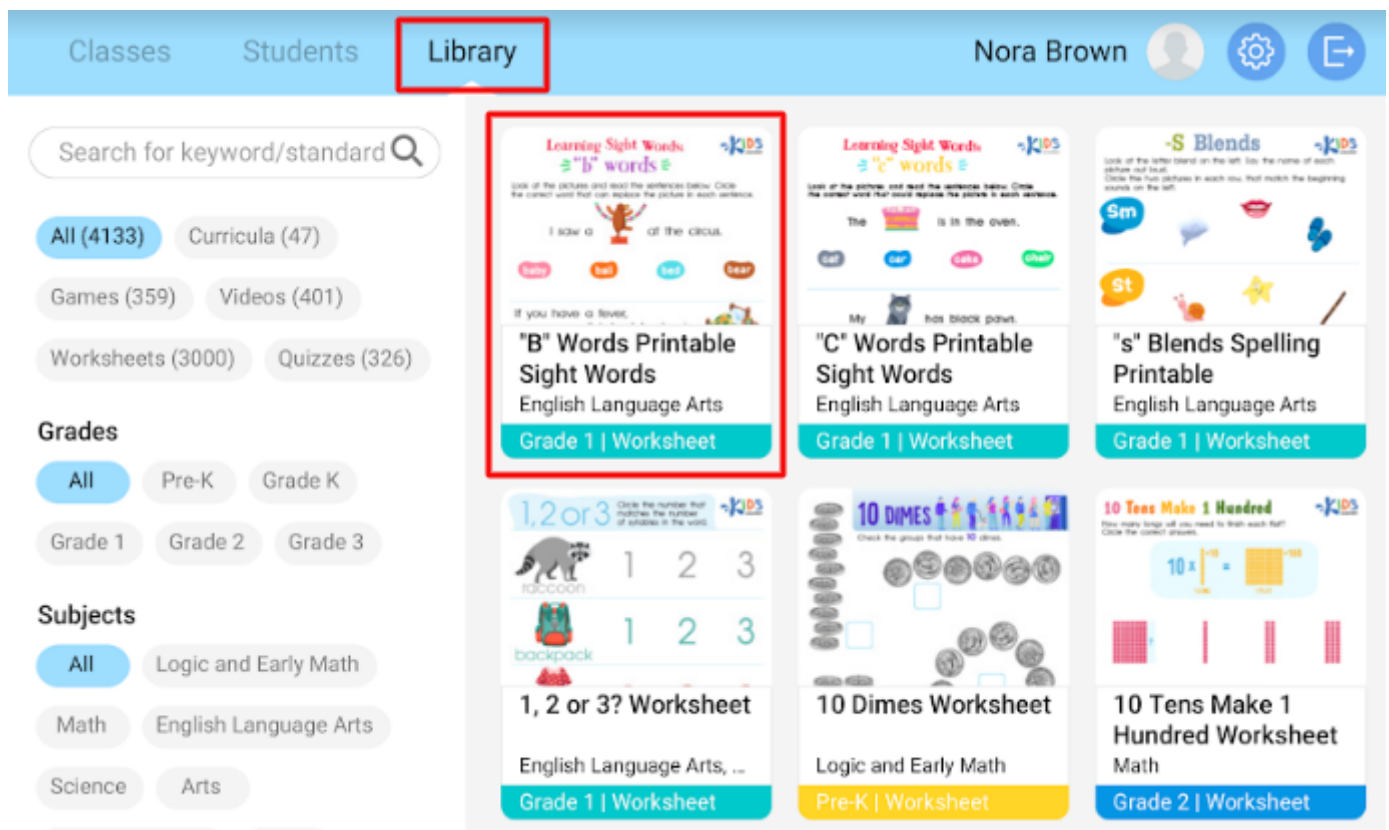

Step 4: Create an Assignment to Get Your Students Started

Now it's time to get to the most important part of the set-up process: creating your first assignment! Our new integration with Google Classroom allows teachers to skip the tedious set-up process and get straight to what matters most. Let's take a look at how to set up lessons and assignments.

First and foremost, teachers can now create an assignment by sharing a single activity, or by assigning an entire lesson, which includes a variety of activities and tasks.

Feel free to share a single activity with your students to allow them to demonstrate mastery of a specific skill, or to pinpoint any specific area for remediation. Just keep in mind that to assign a single activity, students must be enrolled in a class where that lesson is covered. Alternatively, assign an entire lesson for a more thorough exploration into the topic being studied.

To share a single activity, navigate to the "Library" section in the app, or the "Learning Resources" section if you're sharing using Kids Academy for Schools. Select an activity and simply click "Share".

"B" Words Printable Sight Words Worksheet

Subject:
English Language Arts

Grade 1

Description:

Using simple sentences and fun pictures, your child will master sight words in no time!

This sight words worksheet: "B" Words, will help give your child guided practice to choose the correct words to finish each sentence. Build your child's confidence in reading with this helpful worksheet!

After pressing “Share”, there are two options to choose from:

- Copy a link. This option will give you a direct link to share with students.
- Share via Google Classroom. This option will notify your students of new assignments through Google Classroom, and gives a pathway for completing them.

Now you’re ready to get started with your classes, students, and assignments in Kids Academy all through our seamless integration with Google Classroom to make signing in and setting up a snap! Work smarter and not harder by allowing Kids Academy to offer your students the highest quality digital resources in both individual tasks and entire lessons.
