

Lessons. A New Form of Educational Materials for Parents' Convenience

www.kidsacademy.mobi

Here is important information for those parents who are looking for [educational materials on our website](#): we have updated our Learning Resources library not so long ago and added the [Lessons section](#) to make your busy life as a parent easier and more convenient for you. Now there is no need to think about which worksheets or videos you should give your child to go through, or how to compile isolated educational activities into one topic. Everything is ready for young students to get right into learning a topic of your choice with a single click of the mouse!

So what are our lessons? It is a series of activities that you can pass through together with your child. Otherwise, you can hand them out to your child on the tablet so that they have a go at passing the exercises on their own. A lesson usually includes different types of activities all relating to a particular topic.

What are they for? You may use our [free lessons](#) for any purpose: to boost your child's performance in some topics, to practice math, reading, science, etc., to repeat the topics the kid learns in school, to nail down homework, or to enrich the classroom tasks. You may also use them for individual studying or tutoring.

World around Us Lesson - Wild Animals, Preschool

Activity 1 / Row, Row, Row Your Boat | Song

Activity 2 / A Fox and Bird Coloring Page

Flex your child's creativity with this fun-filled coloring page: A Fox and Bird! While coloring, kids express themselves using the colors they choose, giving them the autonomy to make each scene they color their very own. This adorable picture will bring joy to your child's art routine!

Where to Find Kids Academy Lessons?

You can find them on our website. Click on Learning Resources, and scroll down to the [Lessons](#) section in the drop-down menu. It is a standard catalog of activities as we know

it. Here you may choose the necessary grades and subjects to find the topic of interest. After that, you get the list of lessons that corresponds to the chosen filters.

What Do They Look Like and How Do They Work?

When you open the lesson, you see the list of activities it contains. Generally, there are 2-3 activities in the lesson, but the number may vary, depending on the theme of study. Activities are represented in the form of the regular worksheets, interactive worksheets which we have recently introduced on our website (check it out in our recently published [article](#)), and educational videos.

Science Lesson - Animal Life Cycle, Grade 1

Activity 1 / Life Cycle of a Horse Worksheet

LIFE CYCLE of a Horse

Number the life cycle of a horse. Check off the correct numbers.

All mammals have similar lifecycles with many species having its own unique names for every stage of life! Your little learner will love learning more about horses while working on this fascinating science worksheet from Kids Academy! Children will examine the diagram of a horse's lifecycle complete with terms that label each stage of life from birth to adulthood. Then, number the pictures on the bottom half of the page to mark the correct sequence from 1 through 4!

What's Next?

We don't plan to stop at the top and we strive to move further in our dedication to user-friendliness and accessibility of online educational resources. We are glad to present the roadmap for Kids Academy for the near future:

First, we would like to implement [games](#) and quizzes on the website so that our young learners can enjoy them without using the app. Currently, games and quizzes are available only via subscription in the [Talented and Gifted app](#).

Second, we want to allow you to form a playlist of activities. It means that you will be able to set the chosen activities to the child's device or open it on your own tablet or the iPad for the kid to play.

Third, we are considering creating progress reports for parents so that you can understand clearly which activities your kid has made short work of and which ones caused difficulties (if any).

Also, we are aimed at creating extra gaming activities to enrich our "learn-through-play" concept.
