At Kids Academy, we're always working hard to find new ways to get the highest quality learning resources into the hands of parents! That's why we're presenting our preschool reading materials in a variety of ways, to give parents options and flexibility in teaching their little learners to read. Now you can find [preschool worksheets](#) and [videos](#) on our website, in the app, or from our YouTube Channel, which are all wrapped up into our easy-to-navigate [English Language Arts lessons!](#)

Worksheets Designed with Versatility in Mind

Most parents and teachers already know that consistent practice is key for learning foundational skills such as reading, even at the tender preschool level. Our age-appropriate worksheets offer the youngest of learners vibrant illustrations and easy-to-understand directions that help them build critical skills that will aid them in forming a solid foundation for reading comprehension. For instance, a worksheet [like this one](#) about make-believe scenarios helps kids to build the prior knowledge necessary to make sense of what they read in stories and books to come. Most importantly, it appeals to the age and level of the learner as it uses engaging images that help the child to think more deeply.
