

Smart Detective

www.kidsacademy.mobi

“Smart Detective” is another game of the Fun Activity Pack you can find inside our interactive story book “Three Little Pigs”.

The objective of the game is to put the misplaced objects in the piggie’s house into their correct places. You can do this by tapping the two objects you want to swap places. If you choose them correctly you’ll see that they are highlighted with the same color, which is a good hint for children. Once you’ve chosen the correct objects, they change places automatically. The game is provided with voice

instructions and a video tutorial.

Besides the fun factor “Smart Detective” develops attention to detail, a skill kids benefit at school a lot from.

Please, come back on Friday and you’ll get to know what the third game is like!
